May 5, 1980

William Brandt, Director
Department of Public Works
City of Waukegan
196 North Utica Street
Waukegan, Illinois 60035

Dear Mr. Brandt

Your solid waste disposal facility located south of Yorkhouse Road and east of McAree Road in Waukegan, Illinois was inspected on April 16, 1980, by Jeffrey Stofferahn and Diane Spencer, representing this Agency

The inspection disclosed the following condition(s) which constitute violations of the Environmental Protection Act and Chapter 7 of the Illinois Pollution Control Board Solid Waste Rules and Regulations:

. . Leachate was ponded on the southwest corner of the site. You should take immediate action to correct this violation.

Leachate was observed to be seeping from the south, northeast, and east boundaries of the site into the perimeter drainage ditches. You should take immediate action to correct this situation.

Several piles of leaves and other landscape waste were found in the southwest portion of the site. As this site has been closed and covered, no waste can now be accepted for deposition, nor can it be allowed to remain on the site. Should this be due to random dumping, the placement of adequate site restrictions at the site's access will prevent additional dumping. The waste now present should be removed to an Agency permitted landfill.

Page 2

We suggest that you correct the aforementioned violations. A reinspection will be made in the near future to determine your progress.

Sincerely,

Kenneth P. Bechely, Northern Region Manager
Field Operations Section
Division of Land/Noise Pollution Control
